

Tutorial: Lab 1

Quiz, a quick review, then lab time

Faiza

Lab 1

Before 10:10

Please sign in to a lab computer and open Wing 101. We will have a quiz today.

How quizzes work

- Use a lab computer, not your own device
- Be logged in by 10:10 with last week's solution open in Wing 101 (no other IDE)
- The timer starts at 10:15 and you have 10 minutes to complete the quiz. Arrive late and you get less time
- Work on your own: each quiz is a small change to last week's lab
- Today is a practice run, so we start at 10:15 to get everyone set up

Time's up

- Hands off the keyboard
- I'll come around and check everyone's screen
- Once I've checked yours, you're free to start the lab

My notes

I post notes for this course here. Scan the QR code or take a photo of the link.

faizackhan.github.io/notes/csca20

Before you come to tutorial

- Do the prelab and the readings before you come to tutorial
- Stuck? Go to office hours. It's worth it, and no question is too small
- Notes are on the website from the earlier slide

Marks and other tutorials

Marks

- Today is a mock quiz
- From next week: up to 2 marks for attending and working, plus 1 for the quiz
- +1 mark if you complete the quiz, +0 if you don't

Not in this tutorial?

- You can join if there's room. Tell me and I'll check you in
- Enrolled students get priority, so a spot isn't guaranteed
- Be careful with Friday tutorials

- Work on Lab 1 in groups
- Stuck on a specific part? Flag me down
- I'll be outside the classroom for 10 minutes after tutorial, since another class comes in
